

## **Abstract**

An automatic filling stuffing apparatus aims to automatically stuff filling in an elongated and unprocessed pastry. It includes a transporting unit and a pastry supply unit  
5 to supply the elongated pastry, a cutting unit to cut off the elongated pastry to individual pastry during the pastry supply process, a filling stuffing unit and a compression unit to dispose the filling on the pastry held on the surface of a holder, a forming unit to wrap the pastry with the filling contained  
10 therein to form a foodstuff desired, and a conveying unit to carry the formed and finished foodstuff to the next processing step.
